

LIQUID RUBBER WATERPROOF SEALANT

Liquid Rubber Waterproof Sealant is quite literally a liquid rubber that can be applied like any normal paint to most common surfaces to waterproof and protect surfaces. It dries to form a tough, durable, environmentally safe, permanently flexible, fully adhered and seamless membrane, which provides **reliable waterproofing**. It is unaffected by acids, alkali's and waterborne salts, and protects against damage from UV, salt, thermal cycling, harmful chemicals and is resistant to biological deterioration.

PROUDLY NZ MADE

Flexible and crack resistant. Fast drying do-it-yourself waterproofing.

Liquid Rubber Coatings were developed to keep moisture and water out, saving you time and money from the damage moisture can cause. Our innovative and highly flexible products will put your mind at ease knowing your home, materials and structures are protected. For longevity of waterproofing, with Cohe Smooth Coat or Deck Coat for UV protection.

KEY ADVANTAGES

- Waterproofing and corrosion protection
- Environmentally safe
- Permanently flexible and seamless coatings
- Resists cracking and ageing
- Water based
- Unaffected by a range of acids, alkali's and waterborne salts
- Protects against ultra violet rays, salt & thermal cycling
- Easy to apply
