

Tiny Rad - Base

Designed for heating smaller homes and open areas, the Tiny Rad Base features a clean burning firebox design that delivers a peak heat output of 11kW to warm your home. The flat radiant cooktop offers ample space for both pots and kettles and this model can also be fitted with a wetback to assist with your water heating requirements. A small versatile fire that does it all and will provide you many years of warmth.

Specifications were correct at the time of printing but may alter and those detailed should be used only as a guide. If in doubt, please consult your local Metro Fires stockist. Peak heat outputs (kW) are based on the NZHHA test method using dry pine with testing undertaken by independent International Accredited New Zealand (IANZ) testing facilities.
